Better World™

AQUA BARRIER BITUM

Multi-purpose thixotropic bituminous liquid membrane

PRODUCT DESCRIPTION

AQUA BARRIER BITUM is a high-performance thixotropic waterproofing liquid membrane based on bitumen in aqueous emulsion, high-performance elastomeric resins and special technological additives.

It provides a continuous, elastic and highly resistant coating, applicable cold on both vertical and horizontal surfaces.

Color: black

AREAS OF APPLICATION

- Waterproofing of foundations and below-ground walls
- Wet areas: bathrooms, showers, saunas
- Roof applications: sealing and finishing
- Balconies and terraces (also on existing surfaces)
- Cold bonding of bitumen-polymer membranes
- Bonding of insulation panels
- Quick localized repairs
- Ideal as a waterproof base for subsequent tile installation
- Also usable as anti-dust primer (50% dilution)

ADVANTAGES

- High elasticity and ability to absorb micro-cracks
- Waterproof and resistant to UV and weathering
- Excellent chemical resistance
- Easy and safe cold application (no flame required)
- Resistant to standing water
- Excellent adhesion on various substrates
- Compatible with cement-based adhesives
- High durability over time
- Odorless, non-toxic and solvent-free
- Stable at low and high temperatures (no cracking / no dripping)

SUITABLE SUBSTRATES

- Bitumen-polymer membranes
- Concrete
- Metal
- Fiber cement
- Drywall
- Wood
- Existing flooring

PACKAGING

5 kg and 20 kg buckets

SYSTEM COMPONENTS

- AQUA BARRIER LASTIK PRIMER
- AQUA BARRIER TEX 70 PLUS
