Better World™

AQUA BARRIER ROOF

Colored, fiber-reinforced liquid waterproofing membrane

PRODUCT DESCRIPTION

AQUA BARRIER ROOF is a colored, fiber-reinforced liquid waterproofing membrane based on synthetic resins in water dispersion.

It forms a continuous, elastic and walkable coating, resistant to weathering and UV rays.

It can be applied cold, even on existing bituminous membranes without removal.

Available colors: grey, red, green.

AREAS OF APPLICATION

- Roofs, coverings, terraces and balconies
- Bathrooms, showers, saunas
- Underground walls
- Refurbishment of existing waterproofing systems
- Ideal as a waterproof base for subsequent tile installation
- Skim coating of micro-cracked surfaces

MAIN FEATURES

- Continuous and elastic waterproofing
- Resistant to UV rays and weather conditions
- Cold application (flame-free)
- Excellent adhesion on various substrates
- Walkable after curing
- Resistant to non-permanent water ponding
- Low maintenance
- Non-toxic, odorless, solvent-free

SUITABLE SUBSTRATES

- Concrete
- Metal
- Fiber cement
- Plasterboard
- Wood
- Flooring
- Existing bituminous membranes

PACKAGING

5 kg and 20 kg buckets

SYSTEM COMPONENTS

- AQUA BARRIER LASTIK PRIMER
- AQUA BARRIER TEX 70 PLUS
