Better World™

AQUA BARRIER WHITE ROOF FR

White fiber-reinforced liquid waterproofing membrane with
high solar reflectance and improved fire performance

PRODUCT DESCRIPTION

AQUA BARRIER WHITE ROOF FR is a fiber-reinforced liquid waterproofing membrane based on synthetic resins in aqueous dispersion.

Thanks to its advanced formulation, it offers high solar reflectance, helping to reduce surface temperature and improve indoor comfort.

The presence of special self-extinguishing additives also improves the fire performance of the applied system, increasing roof safety.

Color: white

AREAS OF APPLICATION

Ideal for waterproofing and protecting:

- Walkable flat roofs, terraces and balconies
- Wet areas: bathrooms, showers, saunas
- Bituminous membranes and tiled surfaces
- Metal roofs and below-ground walls
- Concrete tanks for non-potable water
- Substrates such as fiber cement, wood, polycarbonate and metal
- Ideal as a substrate for photovoltaic installations

ADVANTAGES

- Improves fire performance of the waterproofing system
- High solar reflectance → reduced surface temperature
- Increased indoor comfort and reduced energy consumption
- Enhances photovoltaic system efficiency
- Durable waterproofing resistant to weathering
- Cold application on existing membranes (no removal required)
- Excellent adhesion on complex and micro-cracked surfaces
- Resistant to foot traffic and mechanical stress
- Low maintenance, no additional protection required
- Odorless, non-toxic, non-flammable and solvent-free

SUITABLE SUBSTRATES

- Concrete
- Metal
- Fiber cement
- Drywall
- Wood
- Existing flooring
- Aged bituminous membranes

PACKAGING

5 kg and 20 kg buckets

SYSTEM COMPONENTS

- AQUA BARRIER LASTIK PRIMER
- AQUA BARRIER TEX 70 PLUS
